

IRB STUDY #IRB202202624

Dental-Child Interaction Training DCIT

Promoting Positive Interactions with Young Dental Patients

This workshop offers dental providers and their teams the chance to learn and practice state-of-the-art, evidence-based techniques for providing quality dental care to children. Participants will gain practical skills to enhance patient comfort and care outcomes.

One-day training workshop will include:

EARN 8 FREE CEU CREDITS!

- ★ Pre- and post-workshop assessments
- ★ Building specialized skills to effectively work with children and parents
- ★ Reviewing filmed segments demonstrating skill use by dental providers demonstrating excellence in DCIT skills
- ★ Practice sessions with direct guidance and coaching
- ★ Continental breakfast, lunch, and refreshments

Dental-Child Interaction Training (DCIT) is a collaborative research study funded by the National Institute of Dental and Craniofacial Research and the National Institutes of Health

In participation with the University of Arkansas, University of North Carolina at Chapel Hill, and West Virginia University
